Disinfection/Wipes

1 2 LLG-Dispenser system Wiper Bowl® Safe & Clean for cleaning tissues

The economical "building block solution" for thorough disinfection and cleaning of sensitive areas in the medical and foodstuff industries. Can be filled with all commercial disinfectant and cleaning agents. The fine perforated structure of Multitex® cleaning tissues ensures an even distribution of the surface disinfectant. These tissues are also ideally suited to the cleaning of grossly soiled surfaces. Easy handling thanks to tear-off perforation. After cleaning the lid can be closed and the tissues stay moistured for more than 30 days ensuring a constant cleaning and disinfection performance.

LLG-Dispenser bucket Wiper Bowl® Safe & Clean:

Empty. For 1 roll Multitex® DR. Made of plastic, dia. approx. 21cm, resealable and reusable.

LLG-Cleaning tissues Multitex® DR:

Viscose fleece for LLG-Dispenser bucket Wiper Bowl® Safe & Clean.

White, fine, tear-resistant, absorbent and lint free.

Dimensions: 300mm x 320mm.

1 roll of 90 tissues

Please order separately.

Box	6	1	7.660 602

1 Universal cleaner, Mucosol®

High performance, alkaline cleaning concentrate in liquid form for soaking and ultrasonic cleaning baths. *Schülke & Mayr GmbH*

Suitable for use on laboratory equipment and instruments made of glass, porcelain, plastic, rubber and metal. Items are cleaned in ~ 10 - 30mins, without mechanical help. An alternative to chromosulphuric acid mixtures, free from chlorine and caustic alkalines, non-toxic, non-corrosive and is biodegradable. Zinc and non-anodized aluminium items should not be immersed in Mucosol® for long periods as corrosion may occur. Also suitable for wiping down surfaces.

Danger

H phrases: H315|H318

Contents: >30% phosphates, <5% anionic surfactants, amphoteric surfactants, complexing agents, corrosion inhibitors, auxiliary agents

Application concentration:
In ultrasonic baths: 0.2% to 2% (1.4ml/l to 14ml/l)
In soaking baths: 0.7% to 3% (5ml/l to 22ml/l)

Physico-chemical data:
Liquid: light green, transparent
Density: approx. 1.4g/ml
pH value (0.7%): approx. 11.5
pH value (3%): approx. 11.7

2 Dust remover spray DRUCKLUFT 67

DRUCKLUFT 67 is a high pressure, inert, liquefied gas with a reduced Global Warming Potential (GWP) value of 7. The dry and oil-free gas does not leave any residues and is non-flammable according to directive 2008/47/EC. The spray bottle is equipped with an extension tube for an accurate cleaning procedure removing dust and loose debris. The balanced spray system delivers a medium spray-pressure. Economic and harmless to sensitive components. *CRC*

2

Dust remover spray DRUCKLUFT 67 SUPER/DRUCKLUFT 67 HOCHDRUCK

Spray for the contact-free removal of dust and dirt from hard-to-reach places. *CRC*
For highest safety also for devices under electric tension. Acc. to Aerosol policy 75/324/EWG no danger of inflammation or explosion even in the presence of ignition sources.
DRUCKLUFT 67 SUPER contains pure and efficient compressed gas. Especially suitable for work under electric tension and for ex-use.

DRUCKLUFT 67 HOCHDRUCK is based on high purity liquified gas with low global warming potential (GWP=7). The dry, oil-free gas will not leave residues and is non-flammable according to directive 2008/47/EC. The high flow rate valve ensures a powerful blowing action for heavy duty applications.

8 Cleaning brushes

ISOLAB

Pack of 10.

Brush with swivel head, head 21mm x 44mm x 24mm for vessels with NS 29/32 or diam. 24 mm, Length: 440 mm

Description	PK	Cat. No.
Brush with swivel head, head 21mm x 44mm x 24mm	10	6.242 423

11. Cleaning and sterilisation

Cleaning implements/Brushes-Hair brushes

1 LLG-Cleaning brushes

Excellent tools for washing and cleaning of all type of laboratory bottles, flasks, tubes, condensers, burettes, etc. Brush material is manufactured from highest quality of fibre/perlon for long life cycle. Brush stem is manufactured from corrosion proof twisted steel wire. Brush handle is manufactured from polypropylene and offers extreme easy handling and use of the brush. Unique handle design enables hanging of the brush to a convenient place for easy reach. Spherical sponge top part enables access to every corner of the labware and guarantees perfect cleaning results.

11. Cleaning and sterilisation

Ultrasonic cleaners/Instruments

1 2 Mini-Ultrasonic Cleaner LLG-uniSONIC 1

For convenient cleaning of goggles or smaller laboratory instruments. Eco-friendly, only needs warm water. By ultrasonic sound millions of small air bubbles are generated. Combined with a very high pressure these achieve a fast, efficient and effortless cleaning.

- Ready to use, no assembly required
- Automatic 3-minute-operation can be stopped anytime
- Removable lid
- Stainless steel tank

Scope of supply: ultrasonic cleaning device, lid

Specifications

Capacity:	approx. 340 ml
Frequency:	45 kHz
cleaning performance:	30 Watt
Outer Dimensions (W x D x H) approx.:	200 x 115 x 115 mm
Dimensions tank (W x D x H) approx.:	155 x 80 x 40 mm
Weight:	630 g
Power supply:	220 ... 240 V, 50 Hz
Warranty:	3 years

Type	PK	Cat. No.
LLG-uniSONIC 1	1	6.263 560

3 Ultrasonic Baths, SONOREX SUPER

These devices work at 35kHz and have transducers for maximum cleaning power. SweepTec® for permanent sound field oscillation ensures even and gentle cleaning. Available with heating with adjustable temperature range from 30 to 80 °C . Power information: High ultrasonic peak power and nominal ultrasonic power 230V, 50/60Hz. All models are spill-proof with stainless steel tanks (RK 102H hard-chromium plated) and outer cases, drip proof (IP32).

For cleaning of technical glassware like burettes, pipettes, petri dishes and laboratory flasks, metal parts of all kinds, electronic components. Also suitable for cleaning and disinfection of medical instruments and acceleration of suspending processes, production of emulsions.

Type RK 102 H and above supplied with outlet
Type H with heating adjustable from 30 to 80 °C

1 Ultrasonic bath SONOCOOL® 255

Bandelin

Ready-to-use set consisting of:

- Ultrasonic bath SC 255
- Sample holder PH 255-11 for 11 inset beakers SD 01.2
- Lid made of glass D 255 G
- Inset beakers SD 01.2, glass - without spout, 20 pieces of 100 ml,
- 250 ml TICKOPUR TR 3 (contact liquid concentrate)

Specifications

Inner tank dimensions (W x D x H):	280 × 150 × 150 mm
Tank volume:	5 litres (contact liquid)
Adjustable temperature range:	4 - 40 °C (at 20 °C room temperature)
Cooling power:	200 W
Ultrasonic peak power:	720 W
Ultrasonic nominal power:	180 W
Power setting:	adjustable: 25/50/75/100 %
Ultrasonic frequency:	35 kHz, SweepTec®
Timer:	10 s - 99 h 59 min 59 s (countdown)
External dimensions (W x D x H):	360 × 605 × 385 mm
Housing:	aluminium: coated with flush pulls (grips recessed inside the housing)
Outlet:	front left, concealed
Current consumption:	1.6 A
Mains connection:	230 V~ (±10 %) 50/60 Hz
Weight:	27.5 kg
IP code:	IP 31

2 Ultrasonic pipette cleaner PR 140 DH

Bandelin

Ultrasonic cleaning of plastic or glass pipettes, burettes and other glassware.

Short cleaning times, no time-consuming washing.

- Gentle cleaning of volume-measuring devices and parts with lengths up to 755 mm
- Pulse function
- With heating for dissolving grease residues
- Robust tank of stainless steel 1.4301, 1.5 mm
- Tilt handles for easy transport
- Placement on the floor nearby the drain
- Cleaning liquid for multiple use, fast emptying by ball valve

Scope of supply:

Ultrasonic bath PR 140 DH incl. pipette basket K 140 B, lid 140 D, cleaning concentrate TICKOPUR R 33 (5 l) and TICKOPUR TR 3 (1 l)

**Danger**

Ultrasonic cleaners/Instruments

1

1 Ultrasonic Bath with Shaking Device SONOSHAKE

Bandelin

Consisting of:

Ultrasonic bath Sonorex Digitec DT 1028 F

- Especially for sonification of samples in laboratory flasks and for rapid degassing (DEGAS)
- Low-profile, ultrasonic bath with stainless steel tank, inner dimensions 500mm x 300mm x 65mm (L x W x D)
- Housing made of stainless steel, protected against spray, 535mm x 325mm x 205mm (L x W x H)
- Outlet: G $\frac{1}{2}$ ball valve
- Timer: 1, 2, 3, 4, 5, 10, 15, 30 min, or continuous
- Ultrasonic peak power 1280W
- Ultrasonic nominal power 320W
- Working frequency 35kHz, SweepTec®
- Current consumption 1.4A

Shaking device SA 1028

- Analogue setting of time (1 to 15 min, or continuous) and shaking frequency
- Reciprocating motion: settings in 4 steps possible of up to 200/min
- Constant amplitude of 20mm independent of loading
- Rack easy to remove - easy mounting of the laboratory clamps EK 10-250 (separately to order)
- Footprint approx. 410mm x 280mm (L x W)
- Holds 36 x 10ml, 36 x 25ml, 18 x 50ml, 12 x 100ml or 10 x 250ml flasks

- Bench space required for Sonoshake approx. 850mm x 360mm (L x W)

An existing SONOREX DIGITEC DT 1028 F ultrasonic bath can easily be retrofitted with the shaker attachment SA 1028.

Sound proof boxes USBB series

Sonation GmbH

The USBB series has been developed especially for the noise insulation of ultrasonic baths in the laboratory.

Advantages:

- High noise reduction up to 30dB(A). That means a drop in noise of 90 to 95%
- Available in four different sizes for mostly all ultrasonic baths, compatibility list for Bandelin Ultrasonic baths on request
- The cover can be completely opened, so the removal of the basket is very easy to handle
- Smooth and easy handling of the cover, no additional space needed when opening, so the box can be placed and operated under extractor hoods
- Control panel stays visible. Thanks to the transparent front, the progress of the washing program can be observed anytime
- Equipped with fast access openings on the front and both sides to operate the ultrasonic bath or to drain the cleaning agent
- Integrated fan to remove vapors
- Recessed grips on the sides for easy transportation
- Powder coated, robust and easy cleanable surface

Type	External dimensions (W x D x H) mm	Internal dimensions (W x D x H) mm	Weight kg	PK	Cat. No.

Concentrates for ultrasonic baths TICKOPUR

Concentrates for SONOREX ultrasonic cleaning baths. Enhances cavitation, cleans intensively, kind to most materials and free from chloride. For use cold or warmed up.

Bandelin

TICKOPUR R 33: Universal cleaner, concentrate. Properties: mildly alkaline pH 9.9 at 1%, dosage 3 to 5%. For: metal, light metals, glass, ceramics, plastic, rubber, e-filters, respirators. Against: grinding, polishing and lapping residues, oily and greasy soiling, waxes, silicone films, ink.

TICKOPUR RW 77: Special cleaner with ammonia, concentrate. Properties: mildly alkaline, pH 9.9 at 1%, dosage 5%. Based on: surfactants, ammonia. For: metal, glass, ceramics, plastic, rubber, boards, watches, test sieves. Beware of light metals. Against: resin, soot, pigments, polishing and lapping residues, greases, oils, waxes, stains, flux.

Concentrates for ultrasonic baths STAMMOPUR

STAMMOPUR concentrates have been especially developed for ultrasonic application and are marked CE according to the Medical Devices Directive (MDD). All solutions are environmentally friendly, biodegradable and easy to dispose. STAMMOPUR contains special active substances and adjuvants which achieve an optimal disinfecting and cleansing effect while at the same time sparing the instruments

Bandelin

STAMMOPUR 24*: Intensive disinfection and cleaning concentrate. VAH-certified-bactericidal, yeasticidal virucidal against BVDV, Vaccinia, HBV, HCV, HIV. Effectiveness EXAM - expertise against H5N1. Free from aldehydes, chlorine and phenol. Application 1% to 2%, mildly alkaline, pH 9.9 (1%). Highly compatible with most materials.

STAMMOPUR DR 8*: Instrument disinfection and intensive cleaning concentrate. VAH-certified. Without aldehydes-, phenols and chlorine. Bactericidal, virucidal against Vaccinia, BVDV, Papova, Adeno, HBV, HCV, HIV, H5N1. Application 1 % to 3 %, mildly alkaline, pH 9.9 (1%).

Strong and flexible: Miele lab washers in three size categories

Miele Professional. Immer Besser.

Miele sets new standards with three model series when it comes to performance, safety and user-friendliness in the reprocessing of laboratory glassware.

- PLW 86* large-chamber lab washers in two widths
- Space-saving SlimLine units with ample capacity on a small footprint
- Compact lab washers* – also as undercounter models
- With EasyLoad – Miele's highly flexible loading system

www.miele.com

Single-source supply

1 | 2 Washer-disinfector PG 8583/PG 8583 CD/PG 8593

Miele

PG 8583

- Capacity per cycle: e.g. 128 laboratory flasks or 98 pipettes together with other laboratory glassware
- Efficient use of resources with the variable speed heater pump
- Monitored for reliability: Wash pressure and spray arm monitoring
- Convenient drying assistance: EcoDry function
- Total security: Link to process documentation possible
- Depending on version, up to 2 integrated dispenser pumps for liquid products

PG 8593

- Additionally with integrated DryPlus hot-air drying

PG 8583 CD

- Additionally conductivity monitoring
- Efficient hot air drying: Dry Plus
- Two integrated dosing pumps (liquid detergent, neutralising agents)
- Setting options for chemical agents (3 x 5l/2x 10l)

In several countries different machine versions of Miele washer-disinfector are available (type, electrical connections etc.)

 Note: We can supply products from the entire Miele laboratory range, on request.

CertoClav tabletop autoclaves

Its versatility and compact construction make autoclaves especially interesting for small labs or they can be used as an optimal addition to a large autoclave.

CertoClav

All models: Low-maintenance. No water connection required. Compliant with 2014/35/EU Low Voltage Directive, 2014/30/EU EMV Directive, 2011/65/EU Directive on the restriction of the use of certain hazardous substances in electrical and electronic equipment.

Vertical models: Class N steam sterilisers. Venting procedure: free steam flow process or fractional flow procedure. A heater is integrated in the bottom of the chamber, but it is not exposed. Therefore, it cannot calcify. The autoclaves are easy to transport and location independent. All you need is a power supply and a mixture of tap water and demineralised water. Safeguarded by a multiple safety system. In aluminum models, it consists of an overpressure valve, a pressure valve, a safety lock inside the lid to prevent opening under pressure and the overpressure safety cavity. In stainless steel models, it consists of an overpressure valve, a pressure valve, a safety lock inside the lid to prevent opening under pressure and a two-bimetal safeguard to prevent overheating of the device.

1 Tabletop autoclaves CertoClav EL

The vertical laboratory autoclave with valve control is suitable for sterilisation of unpackaged solids without hollow bodies, liquids, bottles, instruments, synthetic materials, food preservation, culture media preparation and waste. A precision manometer with drag pointer and a precision thermometer ensure that operations and processes are precise. This autoclave is available in two versions, each with two temperature levels. Pressure control via valve, temperature control via thermostat. Pressure valves are not interchangeable, because the thermostat of the device is perfectly adapted and calibrated to the valve.

CertoClav

Scope of supply: Autoclave, stable instrument panel with 3 feeds, minimum water level indicator, power cable

Specifications	EL 12 // EL 18
Chamber diameter:	240 mm

2 Tabletop autoclaves CertoClav Classic

CertoClav Classic is the result of further development of the EL, but made of corrosion resistant, electropolished stainless steel. Suitable for sterilisation of unpackaged solids without hollow bodies, liquids, bottles, instruments, synthetic materials, food preservation, culture media preparation and waste. A timer is integrated.

CertoClav

Laboratory autoclaves CertoClav MultiControl 2

CertoClav

The PT100 sensor-controlled, vertical laboratory autoclave is suitable for extended/long-term cycles, material tests, HAST test, pressure vessel test und ICP - TM 650, food preservation, culture media preparation, sterilisation of waste, unpackaged solids without hollow bodies, liquids, bottles, instruments, synthetic materials and rubber. Basic version of PC software for data monitoring is included. With this software, you can only set single-step programs. For multi-step programs, PC software professional version is required.

The CertoClav MultiControl 2 Touch is additionally equipped with a 7-inch robust high-resolution tablet. The operating steps are explained with videos on the screen.

- Programmable from 1 minute to 30 days and from room temperature to 140 °C
- Automated process control and error detection
- USB port
- Printer port (RS232) for printing sterilisation protocols

Scope of supply:

MultiControl 2: Autoclave, stable instrument panel with 3 feeds and minimum water level indicator, power cable, MC2 controller

MultiControl 2 touch: Autoclave, stable instrument panel with 3 feeds and minimum water level indicator, power cable, MC2 controller, tablet

2

3 Laboratory autoclaves CertoClav Connect

CertoClav

The fully automated, vertical laboratory autoclave is suitable for extended/ long-term cycles, material tests, HAST Test, pressure vessel test, ICP - TM 650, food preservation, culture media preparation, sterilisation of waste, unpackaged solids without hollow bodies, liquids, bottles, instruments, synthetic materials and rubber. It is operated via of a 7-inch high-resolution tablet. All operating steps are explained with videos directly on the tablet. Compliance with GLP requirements through automatic documentation of users and cycles. Process protocols are stored in the CertoCloud for 10 years. Integration into laboratory data systems possible. For autoclaving liquids, a PT100-media sensor is optionally available.

Scope of supply: Autoclave, stable instrument panel with 3 feeds, minimum water level indicator, power cable, tablet

Specifications

Chamber diameter:	260 mm
Chamber depth:	350 mm
Air evacuation:	Fractional flow procedure

1 Laboratory autoclaves CertoClav Cibus

The fully automatic, freely programmable, vertical laboratory autoclave is suitable for sterilisation of food, beverages, culture media and demineralised water in sealed bottles. For autoclaving liquids, a PT100-media sensor is integrated. It is operated via of a 7-inch high-resolution tablet. All operations are explained with videos directly on the tablet. Compliance with GLP requirements through automatic documentation of users and cycles. Process protocols are stored in the CertoCloud for 10 years. Integration into laboratory data systems possible. Optimised sterilisation time due to active rapid cooling. The autoclave is equipped with support pressure.

Scope of supply: Autoclave, stable instrument panel with 3 feeds, minimum water level indicator, power cable, tablet

Specifications

Chamber diameter:	260 mm
Chamber depth:	350 mm
Air evacuation:	Fractional flow procedure

2 Tabletop autoclaves CertoClav Vacuum Pro series

CertoClav

Due to the intelligent combination of vacuum, pressure and steam, the autoclaves are suitable for liquids and solids of all kinds. The additional media sensor guarantees a complete sterilisation of liquids such as culture media. Solids of all kinds and hollow materials are optimally sterilised with the help of a vacuum pump. The preheatable chamber, cooling-ventilation and vacuum pump guarantees short cycle times from 20 minutes including drying time.

- 7-inch touchscreen
- Including free CertoCloud software for all protocols and programs
- Remote maintenance, alarm system via PC, tablet or smartphone
- Notification by e-mail and SMS
- 12 customisable programs (45 l version with 8 customisable programs)
- Interfaces: USB, WiFi, Ethernet, Bluetooth, SD-Card
- Integrated documentation (GMP/GLP conform)
- Standard interfaces for bar scanner, protocol and label printer

Scope of supply: Autoclave, tray set, power cable, touchscreen

Specifications

Temperaturrange:	105 ... 134 °C

Digital horizontal autoclave Type AH

This autoclave is microprocessor controlled and monitored with 10 sterilisation programmes of which 4 are fixed and 6 are freely selectable and has bacteriological filters included by default.

Raypa

- Operating temperature range 100 °C to 134 °C
- On request, also available with B Class
- RS 232 interface
- Fully automatic functions
- With water reservoir, pre-vacuum and drying
- Case and lid shrouding are AISI 304 stainless steel
- Sterilisation chamber, lid and sealing system are AISI 316 stainless steel
- Electrical heating with protected heating elements
- Safety pressure valve
- Safety thermostat
- Automatic steam controlled by Touch Screen microprocessor
- Manual valves for emptying the sterilisation chamber and for draining steam
- Equipped with mesh stand on the chamber base and trays
- Supply requirements: 230 V 16 A single phase

Type	Capacity Litres	Chamber diam. x depth mm	Width mm	Length mm	Height mm	Rating W	PK	Cat. No.

On request also available counter-pressure, steam generator or without vacuum and drying.

2

6.267 579

Digital vertical autoclaves, AES series

These autoclaves are microprocessor controlled and monitored with 10 sterilisation programmes of which 4 are fixed and 6 are freely programmable.

- Operating temperature range 100 °C to 134 °C
- On request also available with with vacuum pump and steam generator
- Agar modus (40 °C to 80 °C)
- RS 232 interface
- Timer
- Programmable auto-start (24 h)
- Fully automatic functions
- Case and lid shrouding are AISI 304 stainless steel
- Sterilisation chamber, lid and sealing system are AISI 316 stainless steel
- Electrical heating with protected heating elements in the interior of the chamber
- Safety pressure valve
- Safety thermostat
- Automatic steam controlled by microprocessor
- Manual valves for emptying the sterilisation chamber and for draining steam

- Supply requirements:

AES-12 and AES-75: 230 V 16 A single phase

AES-110 and AES-150: 400 V + Neutral (3-phase)

1 Steam sterilizers (autoclaves), HG series

HMC-EUROPE

- Certified according to the Pressure Equipment Directive 2014/68/EU
- Available in 4 sizes with 50, 80, 113, 133 liters of effective usable volume
- Innovative locking system with motorized lid including pressure and temperature monitoring
- Steam generation in the chamber
- High energy efficiency and long service life
- Rapid cooling for short cooling times
- Also available with flexible temperature sensor for the sterilization of liquids
- Timer function and 4 program groups with 3 sub-groups each, including night and dissolution program, adjustments for customized programs are always possible
- No water/waste-water installation required
- Castors for mobile use
- Easy to clean plastic surface with rounded edges in contact areas (no burns or injuries).
- Electrical, mechanical and constructional factors guarantee the highest level of quality and user protection
- The accessories make it possible to configure the autoclave according to your wishes
- Exhaust air filters for laboratories of safety level S2 and higher are also available

Steam sterilisers - Autoclaves/Instruments

Benchtop-Autoclaves HMT FA/-MA and -MB series

HMT 230/260 FA - for standard tasks:

- Certified according to regulation 93/42/EEC
- Available in 2 sizes with a volume of 16 or 24 liters
- 9 sterilization programs, fully automatic: 121 °C wrapped/unwrapped solid items; with or without drying, 135 °C wrapped/unwrapped solid items; with or without drying, Liquid program: 121 °C, 40 min.
- Controlled by a microprocessor
- Simple digital display
- Water tank
- Electromechanical overheating protection
- Safety valve
- Mechanical pressure-dependent door lock
- Reset/emergency button
- Easy maintenance

HMC-EUROPE

7.980 101

HMT 230/260/300 MA - versatile table-top autoclave:

- Certified according to regulation 93/42/EEC
- Available in 3 sizes with a volume of 16, 24 or 40 liters
- Powerful integrated vacuum pump, an essential feature for sterilizing tubes and hollow components
- 7 sterilization programs, fully automatic: 121 °C wrapped/unwrapped (vacuum), 134 °C wrapped/unwrapped (vacuum), Liquid and prion programs, Bowie-Dick test
- Controlled by a microprocessor
- Progress indicator
- Internal water tank
- Electromechanical overheating protection
- Electronic overpressure protection
- Pressure safety valve
- Mechanical pressure-dependent door lock
- Reset/emergency button
- Easy maintenance

2

4.655 164

HMT 260/300 MB - premium table-top autoclave:

- Certified according to regulation 93/42/EEC
- Available in 2 sizes with a volume of 24 or 40 liters
- Powerful integrated vacuum pump, an essential feature for sterilizing tubes and hollow components
- 5 sterilization programs, fully automatic: Sterilization of wrapped items: 121 °C - 30 min.; 134 °C - 15 min.; Sterilization of unwrapped items: 121 °C - 15 min.; 134 °C - 4 min., Individual temperature selection from 105 to 135 °C, Preset prion program
- 3 test programs: leakage test, helix test, Bowie-Dick test
- Controlled by a microprocessor
- Easy operation with a LCD display
- Documentation/data storage via SD card and printer
- Drying program, 1- 60 minutes
- 4 liter water tank, to be filled manually or automatically (purified water)
- Various safety features, e.g. safety valve or pressure-dependent door lock
- With modern design, easy maintenance

1 Autoclave thermometer

Durable bi-metal thermometer with a maximum registering pointer (red), moved up by the temperature measuring pointer (black), to indicate the highest temperature achieved, and remains there until it is manually reset.

Bel-Art Products

- Traceable to NIST Standard
- Threaded connection (1/4" NPT), screws directly into in-line processes, can be used to mount thermometer on included stand
- Waterproof and pressurised, withstands autoclave cycles and has a removable protective silicone sleeve to prevent moisture from making contact with the dial
- Constructed from 304 stainless steel with a glass lens; withstands pressure, high temperatures and rust
- Tested and inspected in the USA
- Includes a multi-language (English, French, German, Italian, Portuguese, and Spanish) Statement of Accuracy and instructions
- Available as an option with an individual Thermometer Calibration Report

Specifications

Measuring range: -20 to +150 °C
 Probe length: 50 mm

2 Biological Indicators Attest™ for Control of Steam Autoclaves

Biological control involves the use of indicators, which check whether all microorganisms were killed during the sterilisation process. The bio-indicators are unique, as they directly indicate how many microbial spores have actually been killed. Thanks to the reliability and quality of the information, the regular use of a bio-indicator can lead to an improvement in the performance of the sterilisation process and thus to better results.

3M Deutschland

Features:

- No external laboratory is required for performance evaluation
- Easy handling
- Reasonable to use after repairs or maintenance of autoclaves

Application:

- Program 3.5 minutes, holding time at 121 °C or 134 °C
- After sterilisation, break the vial in order to bring the nutrient solution into contact with the spore strip
- Results in 48 hours
- Meets EN ISO 11138 standard

Type	PK	Cat. No.
Biological Indicators Attest™ for steam autoclaves, brown cap	100	6.089 578

3

3 4 Screw Cap GL 45 with temperature probe holder, DURAN®

The DURAN® temperature probe holder GL 45 consists of a stainless steel holder that is permanently fitted into a blue DURAN® polypropylene GL 45 cap. The holder will accept the 6.0 mm metal temperature measuring probes that are commonly used in laboratory autoclaves and sterilizers.

DWK Life Sciences

Applications

- Routine sterilization /autoclave cycles
- "Loaded Chamber heat penetration" tests during Performance Qualification (PQ)
- Performance tests after autoclave maintenance or repair

Features

- Usable with DURAN® original GL 45 laboratory bottles (1000 ml or less).
- The depth of the probe can be adjusted to suit the bottle size
- Adjustable ferrule suitable for 6.0 mm diameter probes
- Retrace code for product traceability and downloadable certificate
- Easy positioning of the sensor in the middle of the bottle

1 2 Screw Cap GL 45 thermocouple holder, DURAN®

The DURAN® Screw Cap GL 45 thermocouple holder consists of a holder fitted into a blue DURAN® polypropylene GL 45 cap that accepts up to three separate thermocouple wires used in autoclaves or sterilizers.

DWK Life Sciences

Applications

- "Loaded Chamber heat penetration" tests during Performance Qualification (PQ)
- Routine sterilization /autoclave cycles
- Performance tests after autoclave maintenance or repair

Features

- Usable with DURAN® original GL 45 laboratory bottles (1000 ml or less).
- The 240 mm PTFE tube may be cut to length
- Suitable for holding up to three separate thermocouple wires (Conductor sizes 1/0.3 mm, 1/0.5 mm or 7/0.2 mm)
- Retrace code for product traceability and downloadable certificate

3 Autoclave deodorant Anabac®

Laboratories are very concerned about hygiene, cleanliness and comfort in the workplace. Try Anabac® autoclave deodorant balls to improve the working environment in the laboratory. These autoclave deodorant balls bring a discrete scent that speaks of cleanliness.

1 polySteribox® sterilisation containers with permanent filter

The polySteribox® from Ritter Medical for sterilisation of instruments, storage and transportation of sterile goods is a secure solution in line with the requirements of validated processes in sterile goods provision. The polySteribox® is available in 4 different standardized sizes (SH, M, L and XL) which are suitable for all current sterilisation automats. polySteribox® is produced out of a transparent, dimensionally stable and high temperature resistant (up to 150 degrees celcius) material. It is therefore suitable for autoclave vacuum sterilisation at 121°C or 134°C depending on the sterilisation method recommended by relevant authorities such as the Robert Koch Institute in Germany. In addition the polySteribox® can be used for plasma sterilisation (STERRAD®) as well as for gas sterilisation (formaldehyde and ethylene oxide) at a maximum of 65°C. Lid and bottom close hermetically and include a built-in bacteria barrier. The patented interlocking system is compatible within all different models and prevents from accidental opening of the box. The boxes are space-saving and easy to stack, therefore they are well suited for storage of sterile goods.

Multiparameter Indicator 3M™ Comply™

Class 4 indicators with endpoint reaction. With chemical coating, change their colour when the sterilization cycle is successfully completed. Indicator strips for steam sterilization or ethylene oxide sterilization.

3M Deutschland

- Steam sterilization colour change from yellow to black
- EO sterilization colour change from red to green
- Economical due to the possibility of cutting in half
- Complies with EN ISO 11140-1

1 Self-Seal Sterilization Pouches

Self-seal sterilization pouches are pre-folded and assure accurate and fast closing without the requirement of a heat sealing device. They are especially suited for use in small general practices, dental surgeries and by users who want to avoid costs of additional sealing equipment. The self-seal sterilization pouches are constructed from transparent PET/PP multi-layer copolymer film, medical grade paper and adhesive strip which provides excellent resistance to over-exposure of steam and clean opening. Water based, non-toxic process indicators for steam and ethyleneoxide sterilization complying with ISO 11140-1 are applied on the paper surface and help to differentiate between processed and unprocessed packages.

- Reinforced film to avoid tearing during opening
- Clean and accurate indicator color change
- Tear, fibre-free opening and aseptic presentation
- Triple band seal for higher package integrity

Heat-Sealable Sterilization Pouches and Reels

Heat-sealable sterilisation pouches and reels as a packaging solution for sterilisation applications, ensure reliable protection of the medical device against contamination with bacteria from the time of sterilisation until use of the sterile medical device. Flat and gusseted type and wide range of standard sizes allow optimum choice of correct sized packaging of each item. The sterilisation reels and pouches are constructed from transparent PET/PP multi-layer copolymer film and medical grade paper. Water based, non-toxic process indicators for steam and ethylene oxide sterilisation (complying with ISO 11140-1) are applied on the paper surface. This helps differentiating between processed and unprocessed packages.

- Reinforced film to avoid tearing during opening
- Clean and accurate indicator colour change
- Tear, fibre-free opening and aseptic presentation
- Triple band seal for higher package integrity

The sterilisation pouches and reels are effective barriers against germs and according the requirements of ISO 11607, EN 868-5 and ISO 11140-1 standards.

1

1 Sterilisation Pouches Qualitix®

Suitable for many laboratory instruments. The disposable bags are used for simple and effective wrapping of sterilization goods that are visible through the transparent PET/CPPE film. With the self-sealing strip they can be closed safely and quickly.

Socorex

- Intended for steam and EO gas sterilization
- With two colour indicators
- Robust, durable material
- Wide, self-sealing strip
- Thumb notch for easy opening
- ISO 17665-06 and ISO 11135 conform

2 Roll dispenser with Cutter

The dispenser frame is made of stainless steel and steel rods with nylon bearings for hygienic use at CSSDs. The integrated cutting unit includes an accurate and high quality cutting blade, providing safe and secure handling, as well as easy replacement. The roll dispenser and cutter is a useful addition to rotary sealing machines. It's renewed and the modular design makes it an ergonomic and economic tool which can be used as single or double rack model on working stations or just mounted on the wall.

Description	PK	Cat. No.
Roll dispenser with cutter	1	6.272 287

3

3 Rotary Sealer

This Rotary Sealer is an entry model which is solid, durable and extremely easy to use. Once power is on and the variable temperature adjustment has been done, the Rotary Sealer works when it's needed and stops automatically when the work is done. The basic rotary sealer is microprocessor controlled and the temperature can be adjusted anytime easily. The sensitive temperature ranging between 50 °C and 250 °C provides the user with flexibility to seal different kinds of packaging such as paper/film and Tyvek® pouches. Automatic feeding driven by optical sensors and multiline sealing technique ensure optimum seal strength at continuous operations. This sealing system is validated, calibrated and in compliance with international standards.
